EDUCATION

University of California, Irvine

Bachelor of Science in Computer Science, Minor in Statistics

Irvine, CA

Sep. 2025 – Present

De Anza College

Associate's in Computer Science

Cupertino, CA

Sep. 2023 – June 2025

EXPERIENCE

Web Developer, Contract

Downtown Hamilton Association

May 2026 – Aug 2026

Remote

- Rebuilt a public-facing website unifying three affiliated organizations into a single cohesive digital presence over a 16-week engagement
- Engineered a map-based business directory using Storepoint and Mapbox with bulk location imports
- Partnered one-on-one with the Association's representatives across weekly meetings, translating stakeholder requirements into custom-CSS Squarespace features

Student Web Developer

CourseEater

Sep. 2026 – Present

Irvine, CA

- Built an academic planning platform serving over 5,000 students and counselors across a single platform
- Designed a deterministic planning engine computing prerequisites and enrollment conflicts as a pure function
- Collaborated in an Agile Scrum environment with weekly sprints, backlog refinement, and code review

Women In Computer Science, Committee Member

De Anza College

Sep. 2023 – June 2025

Cupertino, CA

- Collaborated with peers on frontend and API integration projects during coding workshops
- Supported beginner members with Git, React, and Python troubleshooting during build sessions
- Supported technical projects for the club, such as a resource page and member database

PROJECTS

Browzen | *Python, React, Pydantic, Docker, Playwright*

April 2026

- Designed per-session browser isolation using Playwright contexts inside a shared headless Chromium, paired with Redis-backed session state and a WebSocket bridge for live agent event streaming
- Built a Chrome extension and Python backend that uses a sandboxed LLM-driven browser to navigate confusing government and medical websites on behalf of users with cognitive disabilities, returning a simplified UI to a chat-style side panel
- Designed a service-layered FastAPI backend with Pydantic v2 and Redis-persisted session state

Starvest | *Python, JavaScript, React Native, Expo, Flask*

May 2023

- Built a cross-platform mobile app that uses satellite imagery and weather APIs to recommend optimal crops and forecast pest risks
- Designed an AI-driven recommendation engine to analyze parameters and generate crop and soil suggestions
- Integrated NASA Earthdata and Open-Meteo endpoints with a Flask backend using asynchronous requests and caching for fast responses
- Led a 3-member team during a 48-hour hackathon; coordinated design, implementation, and presentation efforts

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C/C++, SQL (Postgres), R

Frameworks: React, Node.js, Flask, Express, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib, uvicorn, pydantic, redis
